

TRANSCRIPT PREPARED BY THE CLERK OF THE LEGISLATURE  
Transcriber's Office  
FLOOR DEBATE

January 23, 2002 LB 259

Senator Bromm and Senator Wehrbein and others were looking at the amendment that I have as drafted. My only intent is to require the vote to apply to what we're talking about under the section of the bill that I would be amending, so, with the concurrence of Senator Bromm and others, I will amend my amendment to insert the words "under this section" so it will be clear that the vote I'm talking about is restricted to this section. That amendment has been drafted. We need time to get it on to the gadget and when you see the amendment on the gadget, what I will do is substitute that for the amendment I have pending. It has to be done in that fashion because we're working on the committee amendments. My amendment is an amendment to the committee amendments. There can be no amendment to an amendment to an amendment. In other words, I cannot amend my amendment, so the way to get it done is to substitute it for the one that's up there now. That way I don't have to withdraw mine, bring it up later, go through this entire discussion again. And since there is agreement on the substitution that will be made, we can,...

SENATOR CUDABACK: One minute.

SENATOR CHAMBERS: ...I think, expedite the handling of my amendment. So that's what will be coming up, but it will be done at the appropriate instant, which is not right this minute. Thank you.

SENATOR CUDABACK: Thank you, Senator Chambers and Senator Janssen. Senator Vrtiska, followed by Senator Wehrbein.

SENATOR VRTISKA: Thank you, Senator Cudaback. I just wanted to make a comment that I've never been a very big advocate of local option sales taxes. I think sometimes that particularly smaller counties and smaller cities and villages are at a disadvantage when we do have a local option sales tax. But when you put it up to a vote of the people I guess it makes it so that that's more palatable and so, therefore, I can support the amendment. And I don't really have a lot to add except I would give some time to Senator Chambers, if he'd like to finish up what he was about.
